Since its introduction in 1998, Wheeled Coach Medic Series has been the undisputed industry leading workhorse, performing with distinction in both small and large fleets. In rural, urban, and metropolitan areas, Wheeled Coach continues that legacy with the Medic Series.

As EMS demands continue to grow and expand, the flexibility that comes with various patient compartment configurations allows you to answer those demands. The lightweight design is easily maneuvered in heavy traffic, which offers increased fuel economy, improved front-end visibility, and electronic roll-stability control.

All of this and more, with the fastest delivery time in the industry.

Demand More. Demand Wheeled Coach.

### Our exclusive EnterSafe™ lighting increases intersection safety

Because the lights are at a 45° angle, vehicles approaching an intersection on a "collision course" with an ambulance will always have the warning lights angled directly toward them, maximizing their effectiveness.
